RELEVANT EXPERIENCE

TEAM LEAD, MINDBODY INC — 2016-PRESENT

Provide technical assistance for our web integrations using developer tools. Consult enterprise customers on how to use our tools with Google Analytics for conversion tracking. Work with development to identify issues with code and write issues for those items. Manage team members and facilitate professional growth and development while managing KPIs. Facilitate transition from acquisition by developing processes and assigning roles. Produced training and instructional videos.

OB/SUPPORT TECH-MANAGER-DIRECTOR, HEALCODE LLC — 2014-2016

I started out providing orientation for a small company that integrated with MINDBODY. We offered widgets for customer to integrate onto their website and I would show them the tools as well as offer to add it to the website for them. As I learned more about the product, I moved into support and developed skills in - CMSs, HTML/CSS, browser support, JavaScript, dev tools, analytics.js. When showing the initiative to advocate for our customer-base I begin working closely with development to align product roadmap and customer need - earning me the title of support manager, then director. With title, I hired and built a team, revamped our support process/tools, set KPIs and SLAs, determined quarterly goals, developed process for bug submission and QA-ing releases, attended MINDBODY conferences on behalf of the company.

EDUCATION

AUSTIN CODING ACADEMY - FULL-STACK JAVASCRIPT CERTIFICATE, 2019
ST. EDWARD'S UNIVERSITY - COMMUNICATION, 2007
